

Wonderful Wildlife

JoJo - A Toad Musical

TRT: 8 MINUTES

"JOJO" celebrates a creative and musical portrait of JoJo Nyaribo, a young nature lover and wildlife advocate as he explores the meaning of biodiversity and stewardship in his own backyard.

TRT: 6 MINUTES

Timber Rattlesnakes of Catoctin Mountain Park

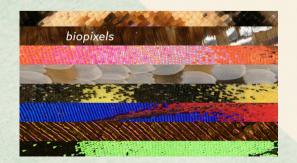

William H. Martin has spent over 60 years hiking the Appalachian Mountains to research and conserve timber rattlesnake populations. Join him on a hike as he searches for these venomous snakes, in an effort to showcase their beauty, docile attitude, and vital importance to a healthy and balanced ecosystem.

The Serpent's Lair

TRT: 12 MINUTES

In the face of extreme habitat loss, wildlife biologist Dr. Chris Jenkins puts an ambitious plan in motion to save two uniquely American reptiles, the eastern indigo snake and the gopher tortoise, and the forest they call home.

Biopixels

TRT: 4 MINUTES

Biopixels explores the world of evolutionary biology on the microscopic scale. Using the latest light microscope technology, butterfly wings become micro-mosaics.

Wonderful Wildlife

Skyward

TRT: 19 MINUTES

Young birdwatchers, Mya and Arjun, feel the pressure of climate change and the biodiversity crisis greatly. Although they feel isolated and judged by others, they are determined to stand up for what they believe in; coming of age in the age of climate chaos. A creative documentary exploring our relationship with nature.

Black Skimmers, under our wing

TRT: 12 MINUTES

A pair of Black Skimmers lay their egg on a barrier island along the Tampa Bay. Three weeks later a fuzzy, sand colored chick emerges from its shell. As the chick grows up, it navigates the challenges of a heavily human populated beach.

The Bat Couple

TRT: 13 MINUTES

Bats dominate her life, day and night. She and her biologist husband, Ben Obitte, comb the caves high up in Nigeria's Afi mountains to research, monitor and understand different bat species, in order to protect them.

Jaguar del Cielo

TRT: 14 MINUTES

By catching jaguars and fitting them with GPS collars, Felix and his co-workers are able to track the movement of jaguars and get insights into their mysterious and elusive lives. The information collected from the collars is crucial to better understand the species and to mitigate conflicts with humans, which is imperative for the long-term conservation of jaguars.

Wonderful Wildlife

The Lone Wolverine of the Wallowas

A husband and wife research team follow in the footsteps of a renowned wolverine expert in the Wallowa Mountains of Eastern Oregon in hopes of detecting the presence of a lone male wolverine named Stormy. They set up several remote monitoring stations deep in the Eagle Cap Wilderness during the dead of winter, and in some of the harshest conditions. Will they even find what they are looking for?

841 TRT: 16 MINUTES

Catching waves and biting boards, Sea Otter 841 has captured the attention of citizens, scientists, and journalists around the world. While she continues to evade capture, the media frenzy has raised the question: What should we do about this unruly otter?

TRT: 125 MINUTES
